Art Unit: 3617

## **DETAILED ACTION**

1. Claims 26-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 26 and 28 are improper Markush type claims, in that since the claimed elements of the group fail to "share a common utility" and fail "to share a substantial structural feature disclosed as being essential to that utility".

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Severence et al. in view of Murayama et al.

Severence et al. teaches the field of the invention, including a pair of phosphorescent bulbs/caps 22. Severence et al. fails to disclose the claimed material.

Murayama et al. teaches such a material, and further teaches application to buoys.

Art Unit: 3617

It would have been obvious to one of ordinary skill in the art at the time of the invention to form the caps of Severence et al. from a phosphorescent material as that taught by Murayama et al.

Such a combination would have been desirable at the time of the invention was made so as to provide for a buoy which will glow a substantial amount of time in the dark.

4. Applicant's arguments filed March 5, 2002 have been fully considered but they are not persuasive.

Applicant argues re the 112 2nd. rejection, that the elements recited in the Markush group are proper and consistent with office practice.

The examiner does not agree. Applicant has not set forth any specifics, case law or appropriate sections of the MPEP to support his argument. The section of the MPEP referenced by Applicant is directed towards restriction practice, and not germane to the issue at hand.

Applicant argues that buoy caps are not suggested by the applied references.

Severance et al. teaches a buoy, and elements 22 are caps, therefore Severance et al. teaches buoy caps.

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 09/778,973

!

Page 4

Art Unit: 3617

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR

1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

will the statutory period for reply expire later than SIX MONTHS from the mailing date of this

final action.

6. Papers relating to this application may be submitted to Technology Center 3600 by facsimile transmission. The submission of such papers by facsimile transmission must comply with

the notice published in the Official Gazette, **1096 OG 30** (November 15, 1989). The Fax Center

number is (703)-872-9326.

7. Any inquiry concerning this communication should be directed to Ed L. Swinehart whose

telephone number is (703)-308-2566.

8. Any inquiry of a general nature or relating to the status of the application should be

directed to the Technology Center 3600 receptionist whose telephone number is (703)-308-1113.
